### DP&L to Build \$5M Solar Facility

Ameridian Specialty Services, Inc. is proud to announce commencement of the largest Solar & Renewable Energy project in Southwest Ohio. Ameridian's Solar & Renewable Energy Division is designing and constructing a photovoltaic system for the Dayton Power & Light Company (DP&L), and it is expected to be operational in March 2010. The 1.1 Megawatt project is located in Montgomery County, Ohio, adjacent to the power company's Yankee Road substation.

At completion, the solar array will contain 9,000 solar panels covering 7+ acres. This solar facility will generate enough electricity to power nearly 150 homes. Building this solar facility will enable DP&L to support their commitment to comply with Ohio's renewable energy requirements.

This project is being built in partnership with several companies, including Miller Valentine Commercial Construction, Inovateus Solar, Square D/Schneider Electric, and ESI Electric.
